### METAL-ERA RELEASES NEW AIRFLOW SOLUTIONS BROCHURE

Waukesha, WI—Metal-Era, Inc., the national leader in commercial roof edge and roof ventilation solutions, announces the release of their updated Airflow Solutions brochure. The brochure showcases the Hi-Perf commercial intake and exhaust roof vents and highlights the importance of creating a balanced roof ventilation system with the correct amount of net free area (NFA).

Metal-Era's Airflow Solutions was developed to create a standard method of intake and exhaust ventilation for commercial roofs. The Hi-Perf line of roof ventilation products are engineered based on the needs of each project to provide the right NFA. Metal-Era covers these products with the only performance warranty currently available in the industry – a 20 year, 120 mph wind and ventilation warranty.

“Commercial buildings have several unique features that make proper roof ventilation different from residential applications, the most important being higher NFA requirements,” says Chief Operating Officer, Tony Mallinger. “This new brochure helps educate design professionals about why a balanced system is important and how the Hi-Perf intake and exhaust vents work together to achieve favorable results.”

The new brochure is available immediately on Metal-Era's website, [www.metalera.com](http://www.metalera.com), or can be requested by calling 800-558-2162.
