METAL-ERA UPDATES 3-PART CSI SPECIFICATION FOR FASCIA, COPING, EAVE & RIDGE VENTILATION SYSTEMS

Waukesha, WI—[Metal-Era, Inc.](http://www.metalera.com), the national leader in [commercial roof edge](#) and [roof ventilation solutions](#), has just released an updated guide specification. The new 3-part CSI specification includes all of Metal-Era's fascia and coping systems in its Roof Edge Solutions division and all the eave and ridge vent systems for its Airflow Solutions division.

The specification was developed in collaboration with ARCAT and is intended to help specification writers and architects as they consider the best roof termination or roof ventilation product for their project's needs.

"It is important that our customers have easy access to the most current spec possible," says Angela Arndt, Marketing Manager. "Working with ARCAT was a great asset for us. They were able to ensure that it met all the formatting requirements and was consistent with industry guidelines."

The specification is available immediately on Metal-Era's website, www.metalera.com or on ARCAT's website www.arcata.com.
