### METAL-ERA LAUNCHES 3 NEW RIDGE VENTS FOR CHALLENGING ROOF CONDITIONS

Waukesha, WI—Metal-Era, Inc., the national leader in commercial roof edge and roof ventilation solutions, announces three new additions to its popular Hi-Perf line of ridge vent products.

The Hi-Perf Ridge Vent provides for proper venting at the ridge, which is critical for any roof design utilizing ventilation. In addition to the slope to slope versions, the Hi-Perf Ridge Vent is now available for other unique applications, including:

- Sloped roof to high wall
- Sloped roof to vertical wall
- Sloped roof to flat roof

Custom ridge vent details are also available.

“We discovered that customers frequently were looking to properly ventilate roof systems in areas

-More-

other than slope to slope. Metal-Era decided to take up the challenge and our new Hi-Perf Ridge Vent versions are the result,” says Tony Mallinger, Chief Operating Officer. “They have proved to be a tremendous asset to and a beneficial solution for design professionals.”

Unlike other ridge vents, Hi-Perf is designed to accommodate individual venting requirements. Therefore, regardless of the amount of airspace underneath the roof covering, Hi-Perf is manufactured proportionately to provide the correct amount of net free vent air.

Hi-Perf’s unique, all metal construction withstands heavy snow loads and will not compress under stress. The ridge vents are both weather and bug proof.

The Hi-Perf Ridge Vents can include a low profile cover available in .040", .050" and .063" aluminum and 24 gauge steel. They are engineered to allow for maximum design flexibility with no exposed fasteners.

The new Hi-Perf Ridge Vent versions are the perfect accompaniment to Metal-Era’s Hi-Perf Vented Fascia and Truss Vent lines, which provide intake venting at the eave and truss. The new versions are available immediately. For more information visit Metal-Era’s website, [www.metallera.com](http://www.metallera.com), or call 800-558-2162.

#### **About Metal-Era, Inc.**

Since 1980, Metal-Era has been committed to unequalled service in the industry, and has provided a wide selection of engineered roof edge systems designed to meet the roofing

-More-

industry's strictest standards. In 2006 Metal-Era introduced an innovative line of airflow products, to provide commercial buildings with proper intake and exhaust venting. Metal-Era employees and its nationwide network of over 350 experienced representatives and distributors are dedicated to providing superior products and personalized service.
