

National Minority Business Supplier

Minority Status

Metal-Era, Inc. is a Wisconsin minority owned, operated and controlled business enterprise and is the nation's largest manufacturer of perimeter roof edge systems and ventilation systems for the commercial roofing industry. Metal-Era is one of the first manufacturers to produce ventilation products specifically designed for commercial roof systems.

Beginning in 1980 as a small manufacturing plant, Metal-Era continues to grow and expand, remaining very active in the commercial roofing industry.

Metal-Era has attained its minority business status because we are Hispanic owned and operated.

Metal-Era's role is to support corporations in meeting their diversity goals either through their purchase of Metal-Era products directly or through our private label partners.

Eligible Products

Purchases directly through Metal-Era or our private label partners allow companies to receive minority participation. For more information on our private label partners visit www.metalera.com or call 800-558-2162.

All product lines (Roof Edges, Airflow and Edge Systems One) are eligible for minority participation.
