

Perma-Tite

Cantilever Gold Coping

The perfect solution for EIFS, brick and panel wall anchoring **At the Right Price**

Perma-Tite Cantilever Gold Coping is the perfect solution for attachment to a parapet wall with a non-structural exterior building facade. Because certain conditions don't allow for traditional anchoring to the exterior building structure, this product's unique support brackets bring extra stability to the roof edge system when attachment is required up to 6" away from the outside facade.

It has a full snap-on design with 16-gauge, galvanized steel anchor clips and factory-applied stainless steel springs that ensure long-term positive attachment. Perma-Tite Cantilever Gold Coping is custom fabricated in sizes to meet specific job requirements.

▶ Try the superior strength and performance of Perma-Tite Cantilever Gold Coping and see how Metal-Era can help you to deliver your project

ON TIME AND ON BUDGET.
