

# CREATE A COPING MITER TEMPLATE

INSTRUCTION SHEET

1. Use a sheet of kraft paper large enough to cover the area.
2. Tape the paper to the wall to ensure that the template does not move.
3. Every template should be marked with the project name and an individual part number. Also mark "This Side Up" on each template and "Outside Face" at the appropriate edge.
4. From the underside of the paper, use a black marking pen to outline the shape of the wall.
5. Carefully remove the template from the wall and move it to a flat surface suitable for cutting.
6. Use a scissors to cut out the template, following the outline.
7. After the template has been cut out, place it back on the wall to verify accuracy.
8. After an accurate template has been achieved, ship to Metal-Era at 1600 Airport Rd. Waukesha, WI 53188, ATTN: Customer Service. For questions please call 800-558-2162.
