ARCH TO STRAIGHT COPING M

ANGLE MEASUREMENT INSTRUCTIONS

- 1. Cut a straightedge 16" long.
- 2. Lay the straight edge against the top of the arched portion of the miter area. Align the straightedge at the corner of the miter area and at the top edge of the arch (as illustrated).
- Measure the angle as shown. Record this measurement in the box provided.
- 4. Fill in the general information below and fax this sheet to Metal-Era.
