

ARCHED COPING

MEASUREMENT INSTRUCTION

1. Using the 36" straight edge provided, place it against the face of the arch aligning the tips of the straight edge to the top edge of the wall (as illustrated).
2. Using the 12" rule provided, measure the distance (rise) from the edge of the yardstick at the 18" mark up to the top edge of the wall.
3. Repeat steps 1 and 2 in several more areas along the arch. Record these measurements in the boxes provided. We will calculate the radius from these measurements.
NOTE! If the measured rise dimensions vary by $\frac{1}{2}$ " or over, contact a Customer Service Rep. at 800-558-2162 for further instructions
4. Fill in the general information below and fax this sheet back.
