

VERSATILE, ECONOMICAL PRODUCTS IN A RANGE OF DESIGNS, COLORS, AND FINISHES

Metal-Era continues our tradition of innovatively designed, rigorously tested roof edge systems with this versatile roof edge fascia system. Perma-Tite® fascia complements your building's natural aesthetics, with no exposed fasteners and features dual attachment points on both the face and roof deck, for added flexibility when accommodating roof irregularities. The clean design is replicated across a variety of roof edges to accommodate multiple roof conditions.

Perma-Tite fascia is available an easy snap-on version for single-ply and built-up roofs or a crimp-on version for installers who prefer a more traditional approach.
